01 / PROFILE

Senior Full Stack .NET Developer with 14+ years of experience building scalable, high-performance applications. Improved system efficiency (+25%), reduced maintenance costs (-30%), and enhanced user satisfaction (+20%). Strong in .NET, Azure, React, and cloud-native architectures. Integrate generative AI into products and develop software through PayRetailers' internal OpenSpec-based AI SDLC, guiding AI-generated code with documented requirements and staged review.

02 / KEY ACHIEVEMENTS

- Migrated multiple services from Azure Functions to Service Bus worker architecture, enabling Kubernetes-native deployments.
- Integrated 300 Burger King stores into an existing ecosystem via a .NET hosted service.
- Led an end-to-end virtual credit card system (AMEX/Mastercard) from inception to deployment.
- Improved a critical enterprise app performance by ~30% and brought test coverage to ~80%.

03 / SKILLS

BACKEND
.NET 10, Entity Framework, RESTful APIs, Worker Services, Minimal APIs, Polly, xUnit, Moq

FRONTEND
Angular, React, TypeScript, JavaScript, Node

DATA
SQL Server, Oracle, DynamoDB, Cosmos DB, MongoDB, Redis

CLOUD & MESSAGING
Azure Functions, Service Bus, Key Vault, App Insights, AWS Lambda, API Gateway, SQS, SNS

DEVOPS & OBSERVABILITY
Azure DevOps, Bitbucket Pipelines, GitHub Actions, Docker, Kubernetes, Terraform, OpenTelemetry, Grafana

PRACTICES
AI SDLC / OpenSpec, spec-driven development, DDD, TDD, CQRS, Event-Driven, Agile / Scrum / Kanban

AI TOOLING
Claude Code, Cursor

04 / EXPERIENCE

Senior Software Engineer

Jul 2025 - Present

PayRetailers · Barcelona, Spain

Payment processing platform with business-critical integrations.

- Migrated multiple services from Azure Functions to Service Bus-based worker architecture, enabling Kubernetes-native deployments.
- Implemented a payment integration as sole developer using PayRetailers' internal OpenSpec-based AI SDLC, reviewing AI-generated code against approved requirements.

.NET 8 | Cosmos DB | Docker | Kubernetes | Terraform

Full Stack .NET Core Developer

Jan 2024 - Jul 2025

Travelport · Barcelona, Spain

Virtual payment solution for AMEX and Mastercard card generation.

- Architected the system from scratch integrating Azure Functions, Cosmos DB, and Key Vault with end-to-end traceability.
- Implemented Azure Key Vault and Auth0, strengthening authentication and secrets management.

.NET 8 | Azure Functions | EF Core | React | Cosmos DB | Key Vault | Docker | Auth0

04 / EXPERIENCE / CONTINUED

Full Stack .NET Core Developer

Oct 2021 - May 2023

UST · Barcelona, Spain

RB Iberia (Burger King Portugal & Spain)

Integration of 300 Burger King Portugal stores into the existing Spain ecosystem.

- Led the integration by building a .NET 7 hosted service to ingest data, validate business rules, and call internal APIs with reliable data flow.
- Delivered the project under tight deadlines while maintaining high reliability and production readiness.

.NET 7 | SQL Server | Entity Framework | Background Services

Dell

Critical enterprise application with opportunities for technical improvement.

- Enhanced application performance by 30% through code optimization and refactoring.
- Achieved 80% test coverage by writing missing unit tests and implementing best practices.

Freelance .NET Core Developer

Nov 2019 - Oct 2021

Rosario, Argentina

End-to-end improvements across multiple .NET applications, focusing on modernization and stability.

- Migrated 5+ legacy applications to modern architectures, reducing technical debt and simplifying ongoing maintenance.
- Built REST APIs and backend services in .NET Core for clients across different industries, delivering production-ready solutions.

.NET Core | .NET Framework | SQL Server | Entity Framework | REST APIs

.NET Core Developer

Oct 2018 - Apr 2019

Adrenalin Media · Sydney, Australia

Hungry Jack's (Burger King) - high-traffic consumer app with thousands of active users.

- Improved app stability, reducing connectivity-related issues by 40%.
- Increased positive feedback on app stores by 20%.

.NET Core 2 | AWS (EC2, Lambda, DynamoDB, Redis, SQS, SNS, SES) | Azure DevOps | Octopus Deploy

Full Stack Developer

Jun 2016 - Jun 2018

Stratos Technology Partners · Christchurch, New Zealand

- WineWorks: Rebuilt a legacy application from scratch, migrating 200+ clients. Reduced production errors by 30%.
- Metrocard: Developed a secure payment portal for 200K+ active users, reducing transaction errors by 20%.

.NET Web API | AngularJS | SQL Server | Entity Framework

05 / EARLIER ROLES

- **Rosario Bus S.A.** · Nov 2015 - Apr 2016 · Rosario, Argentina
  Built an internal driver communication platform, reducing paper usage by 70%.
- **Globant** · Jul 2013 - Nov 2015 · Rosario, Argentina
  Developed dispatch planning systems for Tenaris, streamlining business processes.
- **Neoris** · Nov 2011 - Jul 2013 · Rosario, Argentina
  SharePoint 2010 solutions for the NeoEnergia group (8 companies).

06 / EDUCATION & CERTIFICATIONS

BSc Computer Systems Analysis

Instituto Superior San Pablo, Villa Constitución, Argentina

- Angular: Zero to Expert (2023)
- React: Zero to Expert (2024)
- AI Eng. with Claude Code (2026)

Google Associate Cloud Engineer

April 2023 · ID: aOL1JI

Google Cloud Digital Leader

December 2022 · ID: QSLPH9

07 / LANGUAGES

Spanish: Native

English: Professional (B2)
